- (d) Levels in Lake Pelba occasionally prohibit use of the Bayou Courtableau floodgates on the West Atchafalaya West Guide levee for drainage of the Bayou and the Northern and Central Areas of the watershed; and,
- (e) The Bayou Teche's drainage capability is restricted by a dam at Keystone in St. Martin Parish; and,
- (f) The Vermilion River as shown by May 2017 and August 2019 USACE depth surveys indicating severe shoaling that inhibits drainage for the river for most of Lafayette Parish and portions of Vermilion Parish; and,

**WHEREAS**, the flood of August 2016 brought great loss of homes, businesses, and agricultural crops, equipment, and structures in the entire Teche-Vermilion Watershed; and

**WHEREAS**, active management of drainage control structures and systems as stated herein prior to a significant weather system as defined herein will accommodate additional drainage and retention resulting therefrom; and,

**WHEREAS**, all actions proposed herein would occur while all water levels in the Teche-Vermilion Watershed are at or below their defined flood stages; and,

**NOW THEREFORE BE IT RESOLVED** that the Rapides Parish Police Jury requests that the US Army Corp of Engineers, Tech-Vermilion Fresh Water District (TVFWD), and St. Martin Parish Government proactively and immediately address a threat of a forecast by the National Weather Service of 5 inches or greater rain event across any significant area of the Teche-Vermilion Watershed by lowering the pool stage of Bayou Courtableau at the West Atchafalaya West Guide levee flood gates to 15.65 through the following actions:

- (a) Ceasing any pumping operation by TVFD when pool stages exceed 15.65
- (b) Open gates that drain Bayou Courtableau into the West Atchafalaya Floodway by the USACE if basin levels allow
- (c) Open gates that drain Lake Henderson by the St. Martin Parish Government
- (d) Open gates that drain Bayou Teche into Lake Fausse Pointe By TVFD if lake levels allow

The objective of lowering pool stages in Bayou Courtableau to 15.65', which is the operational pool stage during the month of December, would allow the Bayou Courtableau watershed to store some of the anticipated rainfall accommodating anticipated drainage needs from the weather event and potentially reducing flooding threats. We request that these drainage accommodation operations begin at a minimum of 72 hours or immediately after the forecast by the National Weather Service has been issued or if river flooding causes the level in Lake Pelba to exceed 17.5 feet.

REGULAR MEETING  
SEPTEMBER 18, 2023

A similar pool stage lowering operation was undertaken when Hurricane Barry struck the area in July 2019 which resulted in success in minimizing flood impacts.

**BE IT FURTHER RESOLVED** that the Rapides Parish Police Jury requests the US Army Corp of Engineers, the Tech-Vermilion Fresh Water District, and St. Martin Parish immediately adopted these drainage accommodation operations.

**BE IT FURTHER RESOLVED** that this resolution be sent to each parish governments that will be affected by this request for their consideration and support and that this resolution be sent to the Louisiana Congressional Delegation seeking their support and their intervention with the US Army Corp of Engineers, Teche-Vermilion Fresh Water District, and St. Martin Parish in causing these operational guidelines to be adopted promptly.

**BE IT FURTHER RESOLVED** that certified copies of this Resolution be forwarded to the Executive Director of the Police Jury Association, Governor John Bell Edwards, CPRA, and any other persons, firms or entities as deemed fit and proper.

**THIS RESOLUTION** having been submitted to a vote, upon motion by Mr. Sean McGlothlin, seconded by Mr. Ollie Overton. The vote of the Rapides Parish Police Jury was taken as follows:
